# New Elastics

# Jaeger.

With more than 95 years of experience, Jaeger develops products based on textile and plastic components for many industrial applications. They perform important functions in complete systems: Reinforcing, sealing, coating, laminating, gluing, closing and binding. Jaeger has been an important partner of the shoe and leather goods industry for decades and supplies well-known companies with the highest quality requirements. With offices and sales representatives we are present in the most important shoe manufacturing countries.

Shoes and leather goods are stressed by many factors: processes during production, mechanical effects while wearing as well as influences from external factors such as heat, dryness and moisture. Our textile components add significant value to our customers' products. They optimize processing, improve quality and provide lasting comfort. We act ahead and in line with upcoming trends – with a wide range of standard products and custom-made products that exactly meet our customers' requirements. After all, high-quality shoes and leather goods require high-performance textile components.

## CERTIFICATES

Our integrated management system takes into account the requirements of ISO 9001, ISO 14001 and ISO 50001. Quality and environmental management are active principles of our business policy. Meticulous examinations from the receipt of goods up to the finished product characterize our continuous quality assurance chain.

# New Elastic Collection.

Elastic components provide increased comfort so that the shoe adapts optimally to the foot. Jaeger elastics offer long-term quality and high functionality while representing trendy details. In our new elastic collection we have used high quality yarns in different materials, various colours and trendy designs.

## Metallic Elastics

Our elastics in metallic colours can be combined in many ways and will be an eye-catcher in any collection. The colours represent the precious metals gold, silver, copper and steel.

## Shiney Elastics

With 12 different colours we have introduced our shiney elastics into our assortment. The slightly shimmering effect gives the product a high-quality and a discreet appearance.

## Wool Elastics

Wool is the textile fiber obtained from sheep and has positive properties such as self-cleaning and insulation that ensures a soft feel. Our elastics out of wool in higher width are especially suitable for Chelsea boots and due to its natural look can be combined very well with any kind of leather.

## Houndstooth Elastics

The houndstooth pattern is a duotone textile pattern characterized by broken checks or abstract four-pointed shapes. Whether in clothing, home decoration or print media, this pattern is currently very fashionable. Our high quality houndstooth elastics out of polyamide yarns are also especially suitable for Chelsea boots and let the final product go with the fashion trend.

# Metallic Elastic

## Basic information:

Product group:	Elastic
Article Number:	41420
Description:	Metallic Elastic
Available colours:	4
Recommended application:	Footwear   Leathergood

## Technical information:

Width [mm]:	80, 120, 150
Thickness [mm]:	1.20
Extension:	approx. 100%
Material content:	Polyamide 36%   Polyester 24%   Rubber 40%

Uni colours:  
Gold: 00001  
Silver: 00004  
Copper: 00003  
Steel: 00005

Mottled colours:  
8001  
8002  
8003  
8004  
8005  
8006

# Shiny Elastic

## Basic information:

Product group:	Elastic
Article Number:	41425
Description:	Shiney Elastic
Available colours:	12
Recommended application:	Footwear   Leathergood

## Technical information:

Width [mm]:	120, 150
Thickness [mm]:	1.20
Extension:	approx. 100%
Material content:	Polyamide 36%   Polyester 32%   Rubber 32%

Light colours:  
8003  
8005  
8006  
8007  
8004  
8001

Dark colours:  
8012  
8011  
8008  
8010  
8009  
8002

# Wool Elastic

## Basic information:

Product group:	Elastic
Article Number:	41429
Description:	Wool Elastic
Available colours:	10
Recommended application:	Footwear   Leathergood

## Technical information:

Width [mm]:	120, 150
Thickness [mm]:	1.50
Extension:	approx. 100%
Material content:	Wool 52%   Polyamide 24%   Rubber 24%

New

# Houndstooth Elastic

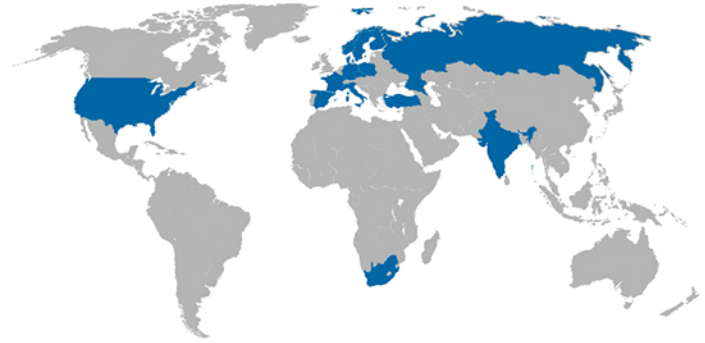

## Basic information:

Product group:	Elastic
Article Number:	EA5617
Description:	Houndstooth Elastic
Available colours:	1, further colours coming soon
Recommended application:	Footwear   Leathergood

## Technical information:

Width [mm]:	80, further width coming soon
Thickness [mm]:	1.40
Extension:	approx. 100%
Material content:	Polyamide 60%   Rubber 40%
